Abstract Text

## ABSTRACT CHECKLIST

Abstracts should meet two requirements, be able to quickly describe the value of the report and whether or not to read it thoroughly. It also should provide the literature searcher enough information to assess its value and to index it for later retrieval.

Use the checklist below to ensure that the abstract meets these requirements. The abstract should:

\_\_ Strive for an impersonal, noncritical, and informative account.

\_\_ Give a clear, grammatically accurate, exact, and stylistically uniform treatment of the subject.

\_\_ Provide rationale or justification for the study. The statement should give a brief account of the purpose, need, and significance of the investigation (hypothesis or how the present work differs from previous work).

\_\_ State the objectives clearly as to what is to be obtained.

\_\_ Give a brief account of the methods, emphasizing departures from the customary. Be specific.

\_\_ Clarify whether it is a field/research experiment or educational activity.

\_\_ Identify scientific names of organisms, mammals, and chemicals, when possible.

\_\_ State results succinctly.

\_\_ Outline conclusions or recommendations. Emphasize the significance of the work, conclusions, and recommendations. This may include new theories, interpretations, evaluations, or applications.

\_\_ Use specific figures whenever possible to avoid use of general terms, especially in presenting the method and reporting the results.

\_\_ Contain at least 150 words for abstract.
